Further Maths GCSE Matrices Answers

1. $A_{S} M=\binom{-2,0}{0,-2} \rightarrow(1,0) \rightarrow(-2,0)$
 Esilazereat s.f. 2 cutre $(0,0)$

Note this is sanx as $\left(\begin{array}{cc}-2, & 0 \\ 0, & -2\end{array}\right)\left(\begin{array}{cc}A & B \\ 1 & 0 \\ 0, & 1\end{array}\right)=\left(\begin{array}{cc}A^{\prime} & B^{\prime} \\ -2 & 0 \\ 0 & -2\end{array}\right)$
2. $P Q=\left(\begin{array}{cc}\sin x, \cos x \\ -\cos x, & \sin x\end{array}\right)\left(\begin{array}{ll}\sin x, & -\cos x \\ \cos x, & \sin x\end{array}\right)$

$$
=\left(\begin{array}{l}
\sin ^{2} x+\cos ^{2} x,-\sin \cos x+\operatorname{six} x \cos x \\
-\cos x \sin x+\sin x \cos x, \\
\cos ^{2} x+\sin ^{2} x
\end{array}\right)
$$

Becaos $\sin ^{2} x+\cos ^{2} x=1$ loe get $P Q=\left(\begin{array}{ll}1, & 0 \\ 0, & 1\end{array}\right)$
3. $\binom{2, a}{1,-3}\binom{a}{b}=\binom{2 a+a b}{a-3 b}=\binom{-1}{2}$
so $2 a+a b=-1$ and $a-3 b=2$ so $a=2+3 b$.
Therfor $2(2+3 b)+(2+3 b) b=-1$

$$
\text { So } 3 b^{2}+8 b+5=0 \quad(3 b+5)(b+1)=0
$$

$$
\text { so } \quad \begin{aligned}
b & =-1 \\
b & =-5 / 3
\end{aligned} \text { gioing } \begin{aligned}
& a=-1 \\
& a=-3
\end{aligned}
$$

$$
b=-5 / 3 \quad a=-3
$$

4. $\binom{-7,4}{5,-3}\left(\begin{array}{cc}-3, & -4 \\ -5,7\end{array}\right)=\binom{1,0}{0,1}$

So $\left(\begin{array}{cc}21^{2}-20, & 28+4 z \\ -15+15, & -20-3 z\end{array}\right)=\left(\begin{array}{ll}1, & 0 \\ 0, & 1\end{array}\right)$
so $28+1+z=0 \Rightarrow z=-7$
Check $-20-3 t=1 \sim$
5. $\left(\begin{array}{ll}3, & 0 \\ 0, & 3\end{array}\right)\left(\begin{array}{ll}1 & B \\ 0, & 1\end{array}\right)=\binom{A^{\prime}}{3}$

6. A positix rotatar means ait-clockcise.

$$
\begin{aligned}
& \text { 7. }\binom{a, b}{-a, 2 b}\binom{5}{4}=\binom{5 a+4 b}{-5 a+8 b}=\binom{1}{17} \\
& \text { so } \begin{array}{l}
5 a+14 b=1 \\
-5 a+8 b=17 \\
12 b
\end{array}+18 \text { so } b=1.5 \text { aro } a=-1
\end{aligned}
$$

8. 

$$
\begin{aligned}
& P Q=\left(\begin{array}{ll}
2, & 3 \\
a, b
\end{array}\right)\left(\begin{array}{ll}
1, & 1 \\
0, & 1
\end{array}\right)=\left(\begin{array}{l}
2,5 \\
a, \\
a+b
\end{array}\right) \\
& Q P=\left(\begin{array}{l}
1, \\
0,1 \\
0,
\end{array}\right)\binom{2,}{a,}=\left(\begin{array}{l}
2+a, \\
a, b+b \\
a,
\end{array}\right)
\end{aligned}
$$

$$
\text { So }\left(\begin{array}{c}
2,5 \\
a, \\
a+b
\end{array}\right)=\left(\begin{array}{cc}
2+a, & 3+b \\
a, & b
\end{array}\right)
$$

top left $\Rightarrow a=0 \quad$ top right $\Rightarrow b=2$
boltom row also loorks.

$$
\text { 9. } \begin{aligned}
\left(\begin{array}{cc}
a, & 2 \\
-1, & 1
\end{array}\right)\binom{3}{4} & =\binom{3 a+8}{1}=\binom{2}{b} \\
3 a+8=2 \Rightarrow a & =-2 \\
1=b \Rightarrow b & =1 .
\end{aligned}
$$

10. $\quad M^{2}=\left(\begin{array}{cc}-2 & -1 \\ 3, & 1\end{array}\right)\left(\begin{array}{cc}-2 & -1 \\ 3, & 1\end{array}\right)=\left(\begin{array}{cc}1, & 1 \\ -3, & -2\end{array}\right)$

$$
M^{3}=\binom{-2,-1}{3,}\binom{1,1}{-3,-2}=\left(\begin{array}{cc}
1, & 0 \\
0, & 1
\end{array}\right) \text { QES }
$$

$$
\text { 11. }\binom{2,-1}{1 / 3,0}\binom{0, b}{a, c}=\left(\begin{array}{cc}
-a, & 2 b-c \\
0, & 1 / 3 b
\end{array}\right)
$$

12. $\left(\begin{array}{cc}A^{\prime} & B^{\prime} \\ 0, & -1 \\ -1 & ,\end{array}\right)$
reftector it lix $y=-x$

So roersing lie transformatunn

$$
R=(-4,3) \Rightarrow Q=(-4,-3) \Rightarrow P=(3,4)
$$

rotation $90^{\circ}$ aincobckiair Centre $(0,0)$
14.

 $\operatorname{or}\left(\begin{array}{ll}0 & 1 \\ 1 & 0\end{array}\right)\left(\begin{array}{cc}-1, & 0 \\ 0, & 1\end{array}\right)$
$\underset{\text { 2nj ist }}{\leftarrow}$
15.

$$
\begin{aligned}
& \left(\begin{array}{l}
1 \\
0
\end{array}, 2\right)\binom{b}{5}=\binom{5}{b} \\
\Rightarrow & b+5 a=5 \\
10=b & \Rightarrow a=-1 .
\end{aligned}
$$
